MAYOR'S INAUGURAL ADDRESS

To the Members of the Council of the City of Kingston.

Gentlemen:—

To be elected an alderman of this good old historic City is undoubtedly a distinct honour and one which I feel sure you fully appreciate. Five of you are serving in the Council for the first time and to those I extend a special welcome—to all of you I tender my hearty congratulations and I be-speak your whole-hearted co-operation and support in all matters that will come before us pertaining to the progress and welfare of the City.

When elected a year ago as Mayor I felt that a high honour had been bestowed on me—to occupy the Mayor's Chair for a second term is indeed a signal honour and I can assure the electors that I shall use my best efforts and ability to justify the confidence they have placed in me.

Labor Situation.

To help provide work for the unemployed was one of the matters that was uppermost in the minds of last year's Council and it is very gratifying to me, and I am sure to you, that the situation this year is greatly improved by the opening of the Locomotive Works; on the other hand we have, even now, a number of unemployed, mostly unskilled labor, who are anxious to work and support their families and thus avoid a dole. I would strongly recommend, therefore, that work be undertaken by the city at once even though such work be more costly in the winter than at other seasons, so that suffering, especially on the part of women and children, may be avoided as far as possible.

Permanent Paving.

We have now nearly thirty miles of excellent pavement in the city—the latest additions—Princess Street from Alfred Street to the City Limits, and Bagot Street from Brock Street to the City Park—are a credit to the City and a good investment. We appreciate the co-operation of the Public Utilities Commission in the construction of Princess Street, and in making this entrance to the City one of the finest streets in the country.

There are still a few streets which require paving but care should be taken that the cost will not prove a burden on the property owners concerned and the tax-payers generally.

In connection with our miles of pavement I consider it high time that systematic patching and cleaning should be undertaken. I would recommend that steps be taken at once to secure the necessary equipment and organize the men employed in the engineer's department to bring this about.

Harbour Improvement.

This is a matter that has been before our citizens for many years. The Harbour Committee and the City Council have in the past done their part to prevail on the Dominion Government to make Kingston the eastern deep water terminal but without success. It now remains for private or municipal enterprise to make Kingston the lake port which its geographical position undoubtedly entitles it and I feel sure that if such enterprise is forthcoming, as I believe it will be, that the Govrnment will co-operate in improving the harbour so that grain transfer plants can be erected and utilized at Kingston. We must continue our efforts in this regard and make our city in the near future one of the larger lake ports.

Chamber of Commerce.

With the assistance of a grant from the City an excellent organization embodying all classes of citizens to the number of over four hundred was brought into being last year. This organization to a great extent, will be what its members make it and from the enthusiasm thus far shown and the co-operation displayed by its members I believe that the Kingston Chamber of Commerce is and will be a real benefit to our community, especially in connection with aiding and securing industries and the tourist traffic. I commend the welfare of this organization to your earnest consideration.

This Year's Budget.

As you are aware the Budget is brought before Council early in the year and is a report from the Committee on Finance and Accounts showing our estimated receipts for the year and how the money is to be allocated and spent. By careful attention to expenditure and with the co-operation of the Board of Education we were able last year to pay our way with adding but a comparatively small increase to the tax-rate. I would urge committees to again carefully prepare their estimates so that no great increase, if any, will be required this year in the tax rate. I also ask that estimates from committees be prepared as soon as possible so that we can arrange our Budget early in the year.

Milk Inspection.

The City Board of Health have reported to Council that the inspection of milk has not been satisfactory during the past year. This is a matter that vitally concerns the health of all citizens, especially children, and to my mind should be remedied immediately. I would recommend that a committee be appointed from the Council to consult with the Board of Health and others, if necessary, and report back with recommendations to Council as to how good, clean, pure milk can be supplied in the city.

Tourist Traffic.

Each year the number of tourists visiting Canada is increasing and Kingston district is enjoying annually a large return from visitors holidaying in this neighbourhood. It is gratifying to note the enthusiastic determination of the Kingston Chamber of Commerce to do all in its power to develop this great and profitable business. I feel it is almost needless for me to point out the desirability of your giving all suggestions tending towards the development and increase of this business a most sympathetic hearing and we should render our assistance in every possible way to make Kingston and Frontenac County a mecca for tourists.

By the death of the late Dr. A. R. B. Williamson, Medical Health Officer for nineteen years, the city has lost a valued and highly regarded official. It should be the business of Council to deal with this vacancy without delay.

In conclusion I can assure you that I have taken and will take the responsibility of being Mayor most seriously and I would ask you to realize your responsibility as Aldermen. I also ask that our deliberations be carried on in a harmonious and dignified manner, each of us giving our best to the City's interests so that when the year's work is ended we shall have the satisfaction of knowing that by our efforts and co-operation we have added a creditable year to the history of our beloved city.

The Mayor and Members of the City Council:

The special Committee appointed by you to investigate the milk situation in Kingston wish to report as follows: being Report No. 30:

Kingston's milk supply at the present time is not considered satisfactory and under the present regulations and system, the public are being unnecessarily exposed to serious danger.

Briefly, existing conditions are as follows:

There are 125 licensed producers, vendors and storekeepers handling Kingston's milk supply.

In addition, there are at least 11 unlicensed vendors or producers.

There are 64 milk producers. During 1928 30 had their milk tested and 34 did not.

There are 20 vendors, none of whom had their milk tested.

There are 41 stores handling milk, and none of this milk was tested.

We find on the records of the Richardson Laboratory the names of 11 people who had their milk tested but whose names do not appear on the list of licensed producers and vendors, as supplied to us by the City Clerk.

A word as to the milk distributed.

It is unnecessary to expend much time outlinging to you the results of the milk tests that were made. It is sufficient to say that the records show the bacterial count to vary from 80 million bacteria per c.c. down to sterile milk. It is impossible for anyone to produce sterile milk, and of course the answer to that is, these samples were doctored. Some of the samples turned in proved to be quite satisfactory as far as the bacterial count was concerned. Others were shown to be in a very dangerous state and totally unfit for human consumption.

2 c.c.'s of milk equal 1 teaspoonful. You will, therefore, see that a teaspoonful of some of the milk contained as much as 160 million bacteria. One glass of milk, which is the amount ordinarily consumed by a child at one sitting, contained 7 billion, 680 million bacteria. Is it any wonder that some of our children have been ill?

As far as the butter fat content is concerned, we find that the tests were carried out in a haphazard manner, and the records of the Dairy School show only fifty-four (54) butter fat tests to have been made during the year. They varied from over 8% butter fat down to 3% butter fat. The Superintendent of the Dairy School, when questioned about the tests, simply laughed and shrugged his shoulders. In other words, he considered the whole business a farce from beginning to end.

There are no records available as to the dirt tests made, but judging from the amount of debris recovered from the clarifying machines where milk is pasteurized in town, there is plenty of room for improvement.

It is not our intention to give the impression that all the milk has a high bacteria count, a low butter fat content, and is dirty. Some of the milk being supplied is of excellent quality, but some of it undoubtedly is much below standard.

No doubt you are familiar with the reports of the farmer meetings held in this vicinity some time ago. Judging from these reports, it would appear that at least some of the cattle producing part of Kingston's milk supply, are suffering from tuberculosis. This is one of the most serious factors of the whole situation, and the farmers are to be commended for their action in endeavouring to correct this fault.

As to the way in which the milk is handled in the City, some of our milk is properly bottled, some is supplied in bulk, some is peddled in open cans, some is bottled on the street, and some has been ladled from open vessels into any sort of container which the purchaser happens to bring along.

One of the most important, if not the most important factor regarding any milk supply, is the method in which it is handled. Milk is one of the food products most easily contaminated. The haphazard methods employed in this City render an already questionable supply even more dangerous.

These facts give you some idea of the milk situation in this City. Your Committee, therefore, wish to recommend as follows:

1. Milk Inspector.

The most efficient manner in which to enforce milk regulations and control the supply is to employ a fully qualified veterinarian as milk inspector. This means a considerable outlay of money, and unless a fully qualified full-time inspector is employed, we recommend that the control and inspection of milk be left entirely in the hands of the Medical Officer of Health, who will have the services of the Sanitary Inspector and others at his disposal. The necessary inspection of cattle to be undertaken by a veterinarian employed by the City for that particular job.

2. The present Milk By-law to be amended as follows:—
Additional Clauses: On and after.

1. No milk shall be accepted for distribution in the City of Kingston except that produced by cattle which have been tested for tuberculosis and proved free of all disease.

On and after.

2. No milk shall be sold in Kingston except certified or pasteurized milk.

3. It shall be unlawful for anyone to use milk bottles or milk cans for any other purpose whatsoever except for holding milk or cream.

Amended Clauses—

1. Section 10E of the present Milk By-law shall be revised to read,—"The result of all said tests shall be open to public inspection at all reasonable times and shall be published by the Medical Officer of Health."

2. Section 12K shall be struck out and the following substituted therefor:

Milk or cream may be delivered in this municipality in bulk or bottles. All milk delivered in bulk shall be sealed by the producer's or vendor's private seal. All milk delivered in bottles shall be properly capped with new caps. Those delivering milk or cream in bottles must have approved appliances for washing and sterilizing bottles. All milk cans, milk bottles and cream bottles shall be thoroughly washed before being returned to the milk vendors or milk producer.

3. Section 12L shall be revised as follows:

The Medical Officer of Health shall have authority to make or cause to be made such bacterial tests of milk produced for sale or offered for sale for consumption within the City of Kingston, as he may deem necessary.

4. Every producer and vendor shall have his milk tested not less than three times per year.

5. Section 12M shall be revised by striking out the words "of the udder or milk glands".

6. Section 19 shall be revised to read: "Not less than 142 and not more than 145". It shall have added to it—The pasteurization of the milk shall be controlled by approved automatic recording thermostats. The records from these machines shall be made available for the Medical Officer of Health at any time.

7. Section 26A shall be revised to read—"Not less than ten dollars, nor more than fifty dollars".

The Board of Health presented the following report regarding the above report:

1. That the Local Board of Health approves of the report from the Special Committee appointed to investigate the milk situation in Kingston subject to the following amendments:

That all the words after "Inspector" in Clause 1 of the recommendations be struck out, and the words "on the recommendation of the Ontario Veterinary Association and Ontario Veterinary College" be substituted in lieu thereof.

That in the last line of Section 1 of amended Clauses of the By-law the words "Medical Officer of Health" be struck out, and the words "Local Board of Health" be substituted in lieu thereof.

Moved by Ald. Hopkins, seconded by Ald. Sargent, (8) that the report of the Special Committee to report on the City's

Milk Supply be received and adopted.—Carried as amended, Clause 2 not being properly signed, and not being before Council.

City Clerk. Mayor.

Ald. Shea presented report No. 29a from the Committee on Finance and Accounts, as follows:—

Civic Budget, 1929.

Kingston, March 21st, 1929.

The Committee on Finance and Accounts, in submitting the estimates for the year 1929, begs leave to report as follows:

The Bonded Debt of the City to 31st December, 1928, is $2,843,174.59 made up as follows:

Water Works		$ 17,000.00
Light Works		482,571.52
SCHOOLS—		
Public	$347,377.81	
High	57,350.00	
		404,727.81
LOCAL IMPROVEMENTS—		
Corporation's Portion	$703,373.30	
Owners' Portion	624.683.66	
		1,328,056.96
General Purposes		610,818.30
		$2,843,174.59

The amount of the Sinking Fund is $952,631.26, and of this amount $814,043.52 is invested in Government and Municipal Debentures and $138,587.74 is on loan to the City until invested.

The amount to be levied for the Sinking Fund this year is $144,331.04, the parties specially benefited paying $57,548.16 and the City generally paying $86,782.88.

Your committee has been obliged to provide for an increase for debentures and interest this year caused largely by the city's share of Highway Construction. Other items causing an increase in expenditure are assessment against the city for Highway Maintenance and the new Air Port. The various spending committees have been provided adequate appropriations, and notwithstanding increased requirements your committee are able to recommend that the same total tax rate be levied as last year. This satisfactory result has been attained through the hearty co-operation of the Board of Education in presenting a budget requiring less money than last year, and from an increase in the assessment for this year.

Your Committee recommends that a rate of 24.75 mills for general purposes, and 13.75 mills for educational purposes, making a total of 38½ mills on the dollar, be placed on this year's ordinary assessment, and that a rate of ½ mill on the dollar for the collection and disposal of garbage be imposed on the assessment liable thereto.

Respectfully submitted.

Passed June 5th, 1929.

WHEREAS in the opinion of two-thirds of all the members of the Council of the corporation of the City of Kingston it was desirable in the public interest to construct asphalt pavements as local improvements on the several portions of streets mentioned and described in column one of the schedule "A", hereto annexed and by the requisite affirmative vote of three-fourths of the members of the said Council, to provide from the general funds of the municipality forty per cent. of that portion of the cost of the construction of the said pavement falling on the property benefited in addition to the part of such cost to be provided by the municipality and to add said forty per cent. to the said part of the cost of construction of the said roadway to be provided by the municipality and to issue debentures for the amount thus obtained.

AND WHEREAS before proceeding with the work the necessary private drain connections from the main sewer to the street line and the necessary water and gas mains, service pipes and stop-cocks were made and laid as set out in schedule "B", the cost of which is to be assessed only upon the particular lot to serve which it was constructed or effected.

AND WHEREAS the said pavements and private branch drains, water and gas mains were duly constructed and temporary advances were obtained to meet the cost thereof, and a report has been made thereupon showing that said works have been fully completed, and that a special assessment roll has been prepared by the City Engineer pursuant to the by-law in that behalf, showing the cost of the said works and making an assessment therefor upon the several lots abutting directly on the works, and it has been certified that the period of ten years is the probable life of the said works.
